**NEW MASONRY DETERGENT**

**DESCRIPTION AND USE**
NMD 80 is a buffered detergent-based solution designed for the cleaning of new masonry structures. NMD 80 can be used on virtually any type of brick, block, stone, cast stone, and pre-cast. No scrubbing is necessary.

**ADVANTAGES**
* Spray-on/spray-off application Increases square foot production and reduces labor.
* Top-down cleaning enables single rinse for whole building.
* Detergent means fewer applications
* No respirator needed when spraying outside
* Reduces water-in-wall problems, such as efflorescence
* Will not harm glass and anodized window frames when used as directed.

**LIMITATIONS**
* Product is very mild but may be corrosive to certain woods, metals, and plants. Covering may be required.
* Always test.
* Avoid elevator doors as the coating will be affected by the chemical.
* Cover any building hardware, including brass, bronze, copper, gold, stainless steel or mild steel.
* Use low pressure rinsing on synthetic stone and surface dyed substrates. Do not brush-apply the product.

**TECHNICAL DATA**
Appearance & Odor: Amber color, mild biting odor.
Physical State: Liquid
pH: 1.0
Vapor Pressure (mmHg): As water
Vapor Density (air=1): As water
Boiling Point: 210 deg F
Freezing/Melting Point: N/A
Specific Gravity (water =1): 1.15
Evaporation Rate: >1 As water
Solubility in Water: Complete

**SURFACES & AIR TEMPERATURES**
Excessively high or low temperatures will produce poor results and possible harm. Best cleaning results are obtained when air and surface temperatures are 40° F or above. Do not clean when temperatures are below freezing or will be overnight. If freezing conditions exist, allow adequate time for surface to thaw. If air temperatures exceed 90° F, flash cool the surface with water before applying product. Do not allow product to dry on a hot surface.

**PRE-TESTING**
Always test prior to beginning full-scale cleaning operations. Testing should confirm cleaning effectiveness on each type of surface and stain designated to be cleaned. Test also to determine the desired surface contact time and any cleanup of new potential for adverse reactions with adjacent materials. Allow test panels to dry thoroughly before evaluating final appearance and results.

**SUITABLE SUBSTRATES**
All brick, block, tile, stone (real and synthetic), mortar, pre-cast, and concrete brick

**DILUTION**
- 4:1 is the standard dilution on most surfaces
- 15:1 - 30:1 for Tilt-Up concrete
Note: Dilutions will vary based on application and surface to be cleaned

**COVERAGE RATES**
Coverage rates will vary from 100-200 sq. ft. per gallon depending on the surface porosity, texture and severity of staining.

**PRE-APPLICATION INFORMATION**
Before applying, read “Protect” in the Preparation section and “Precautionary Measures” under Safety Information. Heavy clumps should be removed while chemical soaks on the wall. Use a steel garden edger, carbide block or brick to remove chunks. Scrape after detergent application. Hold the edger at a narrow angle to the wall and use a quick chop to remove the obstruction.
**Low Pressure Application**
Pre-wet (do not soak) the surface with water. NMD80 can be applied to a dry wall in cooler temperatures. Apply from the top down. Use an EC Jet or a low pressure sprayer, applying with long, even passes. White foam signals product activation. After initial foam collapse, reapply product without rinsing until there is no further foaming. When cleaning sand faced brick, use more applications at standard dilution, scrape, then rinse carefully at low pressures. Before rinsing, use heavy rubber gloves and rub lightly on a mortar smear. The mortar should crumble easily within five minutes of application. If there are problems removing excess mortar with one application, utilize one of these options: decrease the dilution, scrape more thoroughly, or use two or more applications. Water run-down keeps the wall wet, allowing for a larger work area. Rinse the product down and off the wall as work progresses.  
**Caution:** Do not allow the product to dry on a surface.

**Down Stream Projection**
Downstream projection allows for greater distance using high concentrations. Useful for dealing with tilt up concrete for removal of construction dirt and an even surface appearance. Always make sure the dilution is set appropriately.

**Protection**
Building surfaces such as glass, anodized aluminum, brick, block, and even limestone are usually not affected by NMD80. Follow proper job site conduct and safety precautions. Chances of causing harm when using accepted standard practices is minimal. Elevator doors, some imported stainless steel hardware and some brass coated parts need to be covered.

**Tilt-Up Concrete**
Dilutions will vary according to surface finish. A downstream projection nozzle is appropriate for chemical application. Cleanup entails a uniform building face without surface changes, not removal of mortar smears. Apply a light coat of water from top to bottom just to the point of run (except in the case of tall structures with multiple levels, in which case clean one section at a time). Follow this with a quick, even application of NMD80.

**Rinsing**
Rinsing determines the quality of the job. Generalized rules of rinsing would include:

1- Use a wide tip no less than 25 degrees. A 40-degree tip is recommended especially for sand faced or other special brick surfaces to reduce the potential for surface damage. Observe distance from the wall to avoid potential damage to the mortar joints. Rotating zero degree nozzles can do great harm to mortar joints and masonry; keep nozzles well back from surface.
2- Any pressure from 500-2000 psi is acceptable in the hands of a trained worker.
3- Always use overlapping passes to achieve a uniform appearance.
4- Always rinse from top down to prevent drying and to combat operator fatigue.

**Note:** Concrete brick, synthetic masonry and surface dyed substrates need to be rinsed at low pressures (Ex. Standard garden hose with nozzle).

**Precautionary Measures**
Always wear goggles and rubber gloves when handling this product. Keep off of skin and clothing. If material comes in contact with clothing, wash before re-use. Do not dilute NMD80 with any other product except water. Do not use for any other applications other than specified. Do not remove label. Avoid elevator doors as the coating can be affected. Read Material Safety Data Sheet for additional safety and health hazard information prior to use. Do not get in eyes, on skin or clothing. Avoid breathing fumes. Keep container closed when not in use. Use with adequate ventilation. Applicators should wear a rain suit (plastic, rubber or PVC), boots, gloves, face shields and/or goggles to avoid splash to bare skin and eyes. MIOSH/MSHA approved respiration for use with acids if adequate ventilation is unavailable. Though the potential for fuming NMD80 is minimal, take precautions to avoid exposing building occupants to fumes. Dispose of empty containers according to federal, state, and local requirements. Avoid drifting of material or rinse water onto autos and pedestrians by protecting or diverting such traffic.
**New Masonry Detergent**

**Spill or Leak Procedures**
Check with the state, local, or federal regulations for waste disposal methods in the area. Wear proper protective equipment while doing cleanup. For large spills, dike and contain for intended use. For small spills, use a chemical absorbent product and place in approved container for disposal.

**Container Handling/Storage**
Store the product in a cool, dry place away from alkali/base. Do not allow this product to freeze. Vent bung cap before opening. Keep container tightly closed when not in use. Wash thoroughly after handling. Empty containers retain residue and vapors and must be handled as if full. Completely rinse drum prior to disposal.

**Instructions in Case of Contact or Exposure**
- **Eyes:** Flood with water for fifteen minutes and seek medical attention. Remove contact lenses immediately.
- **Skin:** Wash off with soap and water. Use a good skin emollient. If irritation develops, seek medical attention.
- **Ingestion:** Drink lots of water to dilute. Do not induce vomiting. Seek immediate medical attention.
- **Inhalation:** Remove to fresh air. Call physician and seek medical attention if irritation develops.

**Notice**
This product has been classified in accordance with the hazard criteria of the CFR.

**Disclaimer**
The information herein is given in good faith, but no warranty, either expressed or implied is made. Final determination of the suitability of any material is the sole responsibility of the user. All materials may present unknown hazards and should be used with caution. Although certain hazards are described herein we cannot be sure or guarantee these are the only hazards which exist.

**Customer Service**
Factory personnel are available for assistance at 800-313-8505 and will send you additional information on products as necessary.
